Skills

Programming Languages: TypeScript, JavaScript, JSX, Django, CSS3, HTML5.

Technologies: React, Next, Tailwind, Figma, Framer Motion, NPM, Git.

Web Architecture: Docker, AWS, Shopify Hydrogen.

Experience

Jeff Martin Auctioneers

May 2024 - Present • Austin, TX

Front-End Developer

- Led the engineering and development of 83 responsive pages by creating and translating Figma designs into polished UIs, incorporating accessibility testing with WAVE, and iterating based on UX feedback
- Built 176 modular JSX React components leveraging hooks, context, and form handling to retrieve data from 8 API services through a unified gateway, delivering smooth, intuitive experiences for non-technical users.
- Implemented and styled 33 reusable Shadcn/UI components with Tailwind CSS, animated them using Framer Motion, and accelerated development with Claude (LLM) for AI-powered code generation.
- Ensured scalable and maintainable code across 15 GitHub repositories by using Prettier formatting, participating in daily peer reviews for QA, and collaborating with 6 cross-team developers – integrating stakeholder feedback from weekly meetings.
- Configured and customized a secure email system in Django using custom routes and models to send one-time passwords (OTPs) and facilitate password resets, improving user authentication and account recovery.
- Adapted a Git Bash script to automate environment setup by pulling code from 15 GitHub repositories and starting Docker containers, streamlining the development workflow for the entire engineering team.

Cooledtured

November 2023 - March 2024 • Austin, TX

Front-End Intern

- Implemented 7 reusable components and 2 cutting-edge pages with React, GraphQL, TypeScript, and Tailwind CSS to refactor a legacy frontend design into a modern UI for an E-Commerce start-up.
- Cooperated with 8 developers, using Git and NPM for seamless collaboration, deploying a complete website re-design for a company with over 125 employees and 150,000 monthly users.
- Designed 9 responsive components and pages by working with Figma and strategizing with senior engineers and project managers in 20 weekly meetings, leading to an optimized user experience.
- Solved 9 tickets to 100% completion, participated in 15 code reviews, and iterated code updates upon feedback, producing a reliable headless commerce managed by 5 executives using the Shopify Hydrogen framework.
- Orchestrated 5 accurate storyboards for different use case scenarios, as well as UX analysis and surveying.

Renzo Box

June 2022 - January 2023 • Austin, TX

Full-Stack Intern

- Iterated software development lifecycle for 7 fresh components by leveraging my skills in React, Typescript, and Tailwind CSS based on constant feedback to implement detail-oriented web pages designed with Sketch.
- Arranged 100% availability for a dependable cloud environment by adapting AWS services such as Amplify, S3, and Lambda to support functionality of Dockerized applications, guaranteeing a reliable cloud-driven software.
- Ensured 100% performance of CRUD operations by maintaining a Flask server connected to a SQL database.
- Slashed post-release defects by 50% by adapting full-stack engineering best practices, ensuring code integrity through clean code, documentation, code reviews, and continuous integration.
- Delivered 8 engaging presentations to product owners to communicate progress and receive feedback, and met deadlines for all 8 sprints, resulting in increased stakeholder satisfaction and an outstanding MVP Demo Day.

Education

Bachelor of Science in Computer Science

May 2024 • Austin, TX

St. Edward's University • Minor in Business
