

Garick Mendez

Austin, TX • garickmendez7@gmail.com • 512.947.9149 • in/garick-mendez • garickm.com • github.com/garick-git

Software Developer with 4+ years of experience building TypeScript/React/Next.js front-ends and Python/Flask/Django back-ends on AWS/Docker cloud infrastructure, including 2 years owning front-end architecture and UI/UX design. Bilingual (English/Spanish) with a business minor that sharpened my understanding of business needs.

Skills

Programming Languages: TypeScript, JavaScript, Python, SQL.

Technologies: React, Next.js, REST API, WebSockets, Django, Flask, Vitest, pytest, Stripe, Figma, Tailwind, Jira, Dolby API.

Cloud & Infrastructure: AWS (Amplify, S3, Lambda), Docker.

Experience

Hunt Safe Technologies

August 2026 - Present • Austin, TX

Back-End Intern

- Testing and debugging a 152-endpoint REST API for HuntSync, a Python/Django based SaaS for hunting club management, prioritizing Payments/Stripe and Safety flows.
- Building and maintaining a pytest regression suite for HuntSync's backend, tracking findings in a living bug/coverage log to brief the founding engineer directly.

Jeff Martin Auctioneers

May 2024 - August 2026 • Austin, TX

Front-End Developer

- Led design-to-code for 83 responsive pages as the sole front-end developer, building WCAG-compliant UI from Figma designs based on user pain points, validated with WAVE and shadow testing against a live production auction run with 20-40 internal staff.
- Collaborated with 3 senior backend engineers on API design decisions for 8 services behind a unified gateway and built 176 TypeScript/React components using hooks, context, and state management to integrate relational data into the UI.
- Created an interface for managing live auction operations, including video streaming via the Dolby API synced across customer and staff sites, and a WebSocket-powered auctioneer display to show current items, send announcements, and control the livestream.
- Engineered CRUD pages for 5 object types (Users, Staff, Inventory, Auctions, Locations), each with a reusable, customizable table component for viewing, editing them via dialogs and dedicated pages, and creating new ones.
- Wrote and maintained 50+ Vitest unit tests covering core functions, validators, formatters, and components across two Next.js applications, run before every push to maintain a stable, production-bug-free release cycle.
- Owned 2 accessibility epics (5 customer-side, 7 staff-side user stories) to close app-wide WCAG gaps, creating and resolving Jira tickets in an 8-epic team backlog spanning Front-End, Back-End, and DevOps.

Renzoe Box

June 2022 - January 2023 • Austin, TX

Full-Stack Intern

- Supported cloud infrastructure using AWS services (Amplify, S3, Lambda) for Dockerized applications and backend development by implementing CRUD operations in a Flask/SQL environment under senior engineers.
- Slashed post-release defects by 50% through code linting, Git-based reviews, and documentation, while delivering 8 sprint presentations directly to product owners and meeting 100% of sprint deadlines.

Education

Bachelor of Science in Computer Science
St. Edward's University • Minor in Business

May 2024 • Austin, TX
