Front-End Developer with 4+ years leading UI development in React, Next.js, and TypeScript, building scalable interfaces with Tailwind CSS and Vitest. Skilled at translating diverse design systems into accessible, production-ready UI.

Skills

Programming Languages: TypeScript, JavaScript, JSX, CSS3, HTML5.

Technologies: React, Next, Tailwind, Figma, Framer Motion, NPM, Git, Django, JSON, REST API, Vitest, SQL, Flask.

Web Architecture: Docker, AWS, Shopify Hydrogen.

Experience

Jeff Martin Auctioneers

May 2024 - August 2026 • Austin, TX

Front-End Developer

- Led the design-to-code process for 83 responsive pages, translating Figma designs into accessible, production-ready UI and validating it through mock auction testing with 20-40 internal staff, incorporating WCAG-based accessibility testing (WAVE) and iterative feedback.
- Built 176 modular React components using hooks, context, and state management, integrating data from 8 API services through a unified gateway to deliver smooth, intuitive UX.
- Implemented and styled 33 reusable Shadcn/UI components with Tailwind CSS and animated interactions with Framer Motion, building a scalable component library that saved the team hours of duplicated work.
- Wrote and maintained 50+ unit tests with Vitest covering core functions, validators, and formatters across two Next.js applications, maintaining a stable, production-bug-free release cycle.
- Streamlined developer workflow across 15 GitHub repositories with Prettier standards, code reviews, and a custom Git Bash automation script that cut environment setup time by 80% for a team of 6.

Cooledtured

November 2023 - March 2024 • Austin, TX

Front-End Intern

- Refactored a legacy frontend into a modern UI using React, TypeScript, GraphQL, and Tailwind CSS, working under senior engineers and PMs to translate design specs into production-ready code.
- Collaborated with a team of 8 developers using Git and NPM to deploy a full website redesign for a company of 125+ employees serving 150,000 monthly users.
- Resolved 9 development tickets and reviewed peer code across 15 pull requests, contributing to a reliable headless commerce platform on Shopify Hydrogen used by company executives.

Renzo Box

June 2022 - January 2023 • Austin, TX

Full-Stack Intern

- Maintained reliable cloud infrastructure using AWS services (Amplify, S3, Lambda) supporting Dockerized applications, and supported backend development by implementing CRUD operations in a Flask/SQL environment.
- Slashed post-release defects by 50% by applying full-stack engineering best practices, including clean code standards, documentation, and code reviews.
- Delivered 8 weekly sprint presentations directly to product owners and met every sprint deadline, strengthening stakeholder confidence throughout the internship.

Education

Bachelor of Science in Computer Science
St. Edward's University • Minor in Business

May 2024 • Austin, TX
